

## ADVANTAGES

- Individually VOC outgassing tested
- High media cleanliness
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Typical target gases: VOCs, acids, bases, dopants, refractories, ozone
- Multiple media types can be combined into the same filter
- Low pressure drop
- Low outgassing components

<b>Application</b>	Remove airborne molecular contaminants (AMC) from recirculation air systems and make-up air systems in microelectronic or life sciences facilities and cleanrooms.
<b>Frame</b>	Stainless steel;Galvanized steel
<b>Gasket</b>	Polyurethane;EPDM
<b>Sealant</b>	Polyurethane
<b>Max Temperature (°C)</b>	40
<b>Relative Humidity max</b>	30% - 70%
<b>Installation Options</b>	Adaptor frames are available for installation above fan filter units, mini-environment or process equipment
<b>Particle cleanliness</b>	ISO Class 6
<b>Comment</b>	Gasket Position: 01 - downstream, 10 - upstream Outgassing: Individually outgassing tested for VOC emissions
